CLOSE YOUR RIGHT EYE
WHILE YOU READ THIS.

With your right eye closed, hold this page at arm's length. Now slowly move it back and forth, left and right. Did the dot on the other side of the page disappear? That's your blind spot. Your car has one, too. Fortunately, Acura has technology that can detect objects in your blind spot. And while some other systems can only detect objects at higher speeds, ours is capable of detecting objects while traveling at speeds as low as six miles per hour. The available blind spot information system in the Acura MDX. The most innovative thinking you'll find, you'll find in an Acura. Learn more at acura.com.

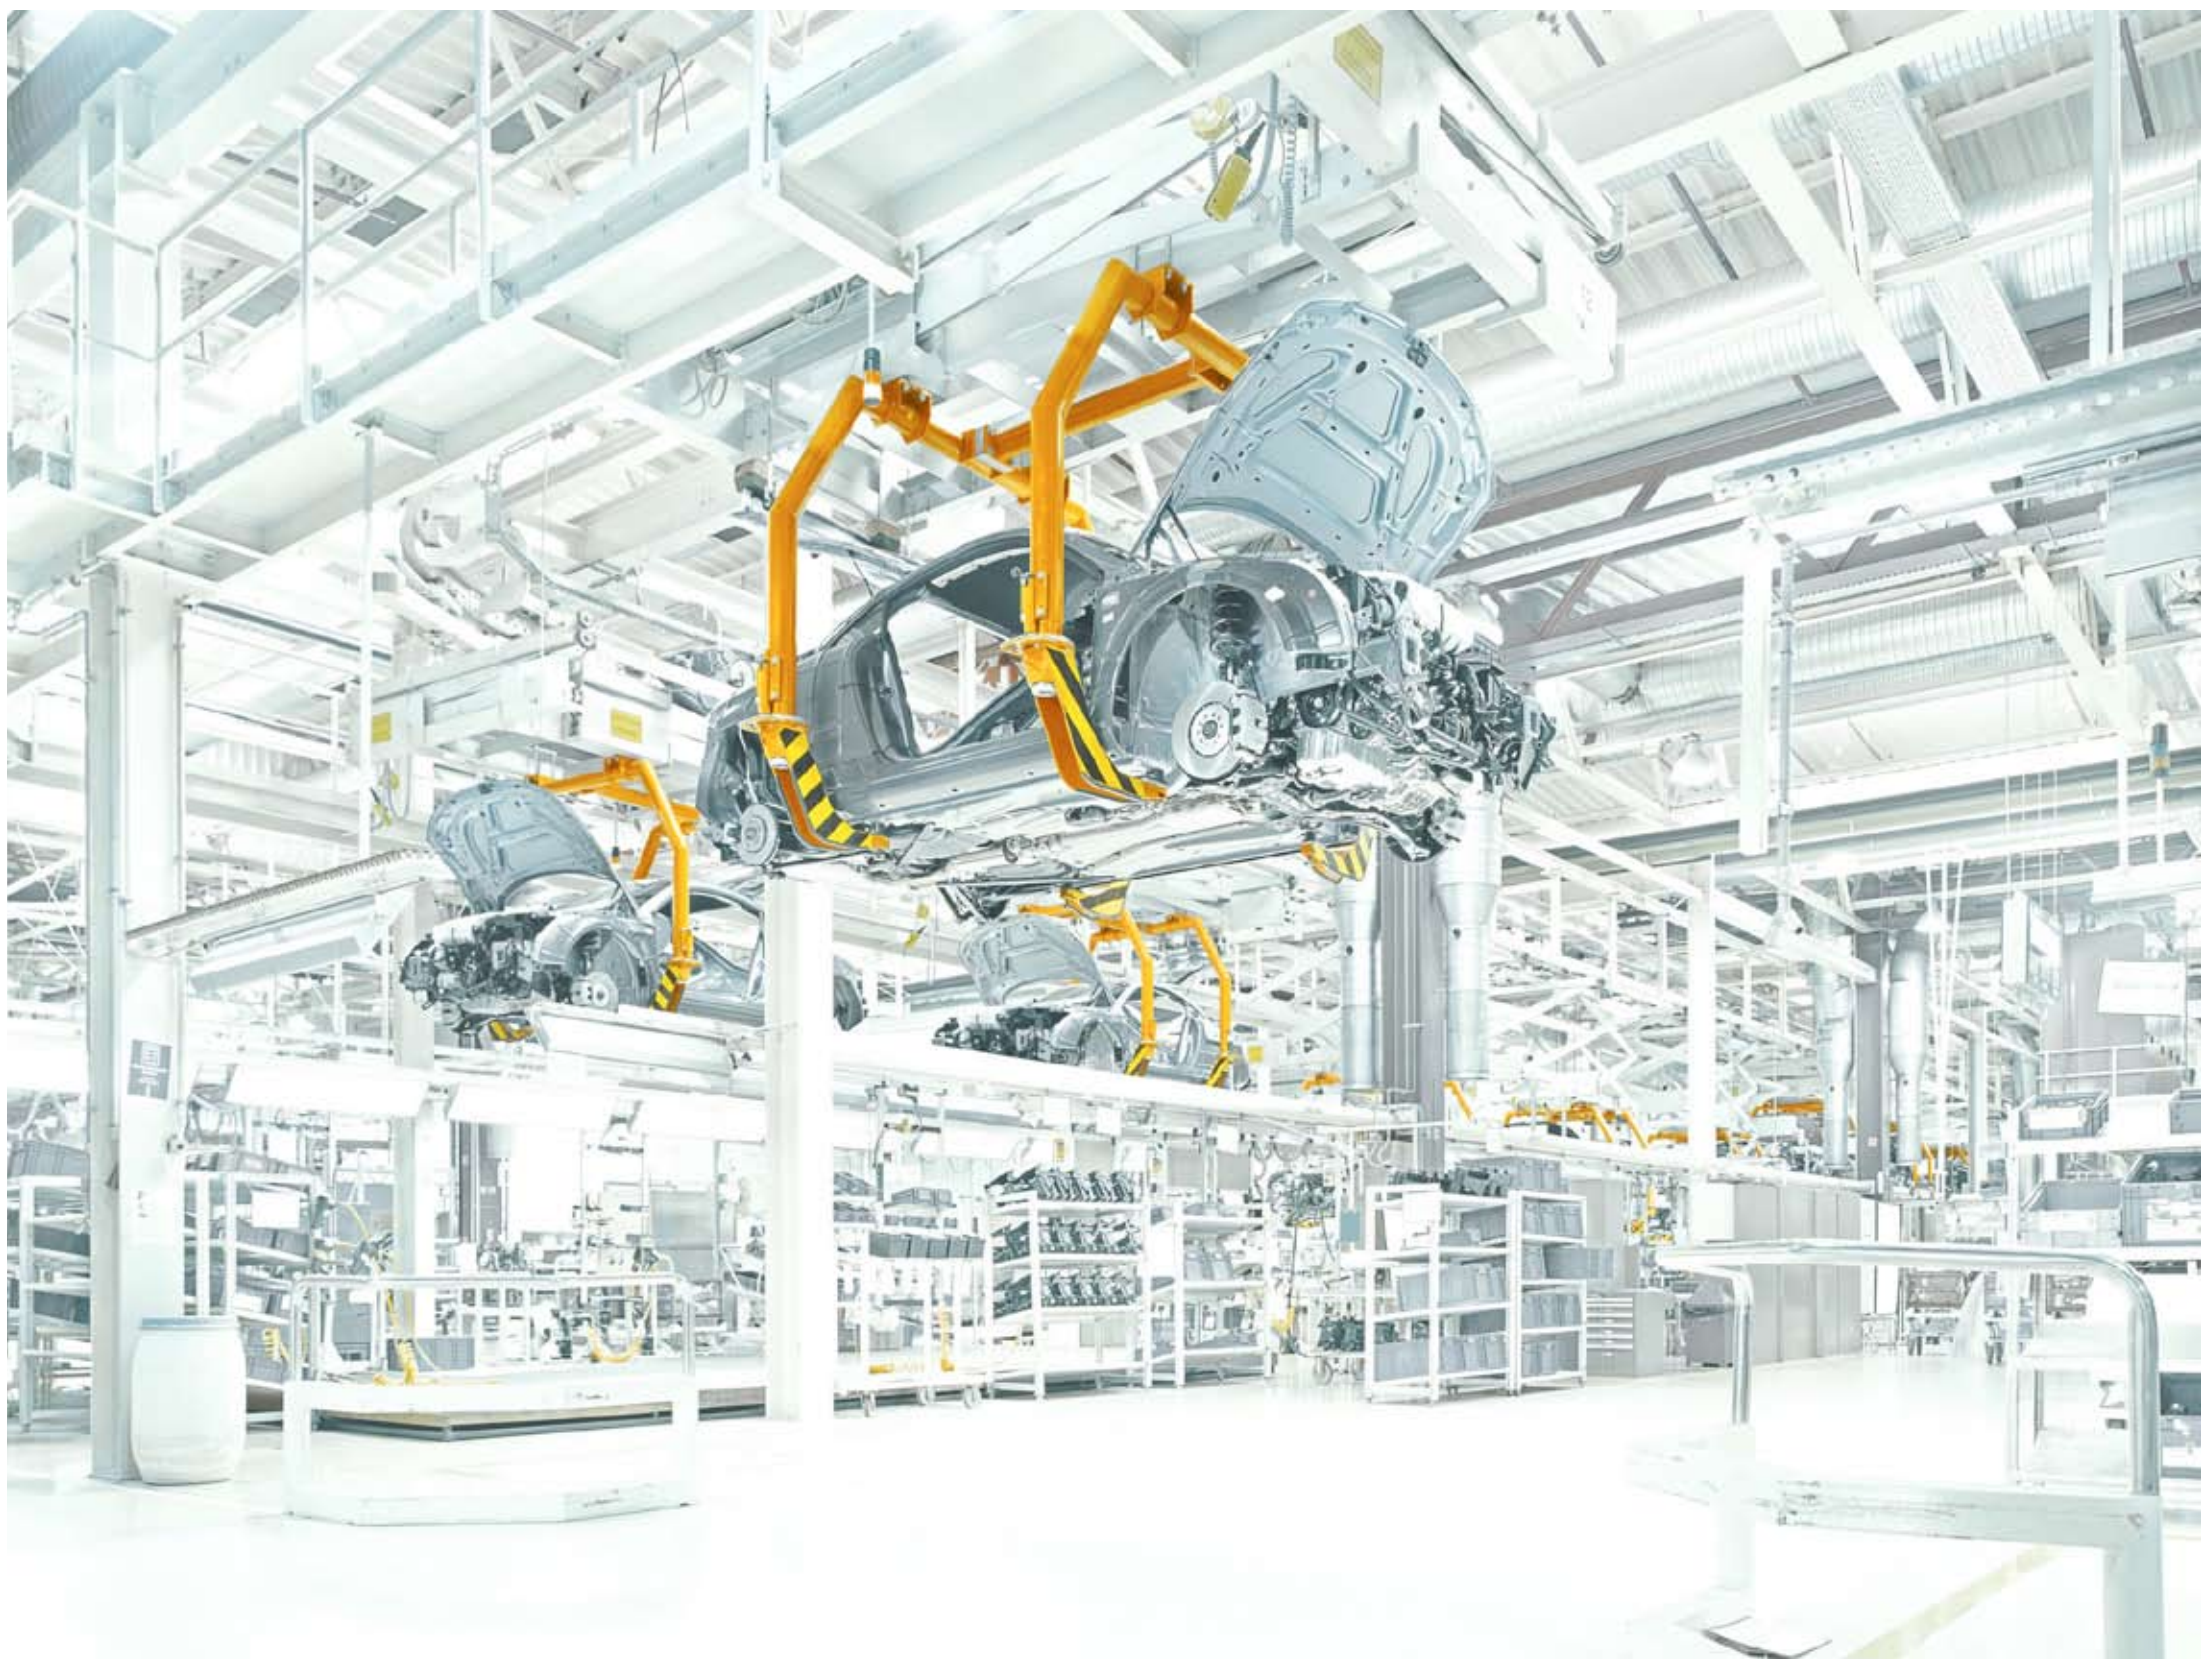

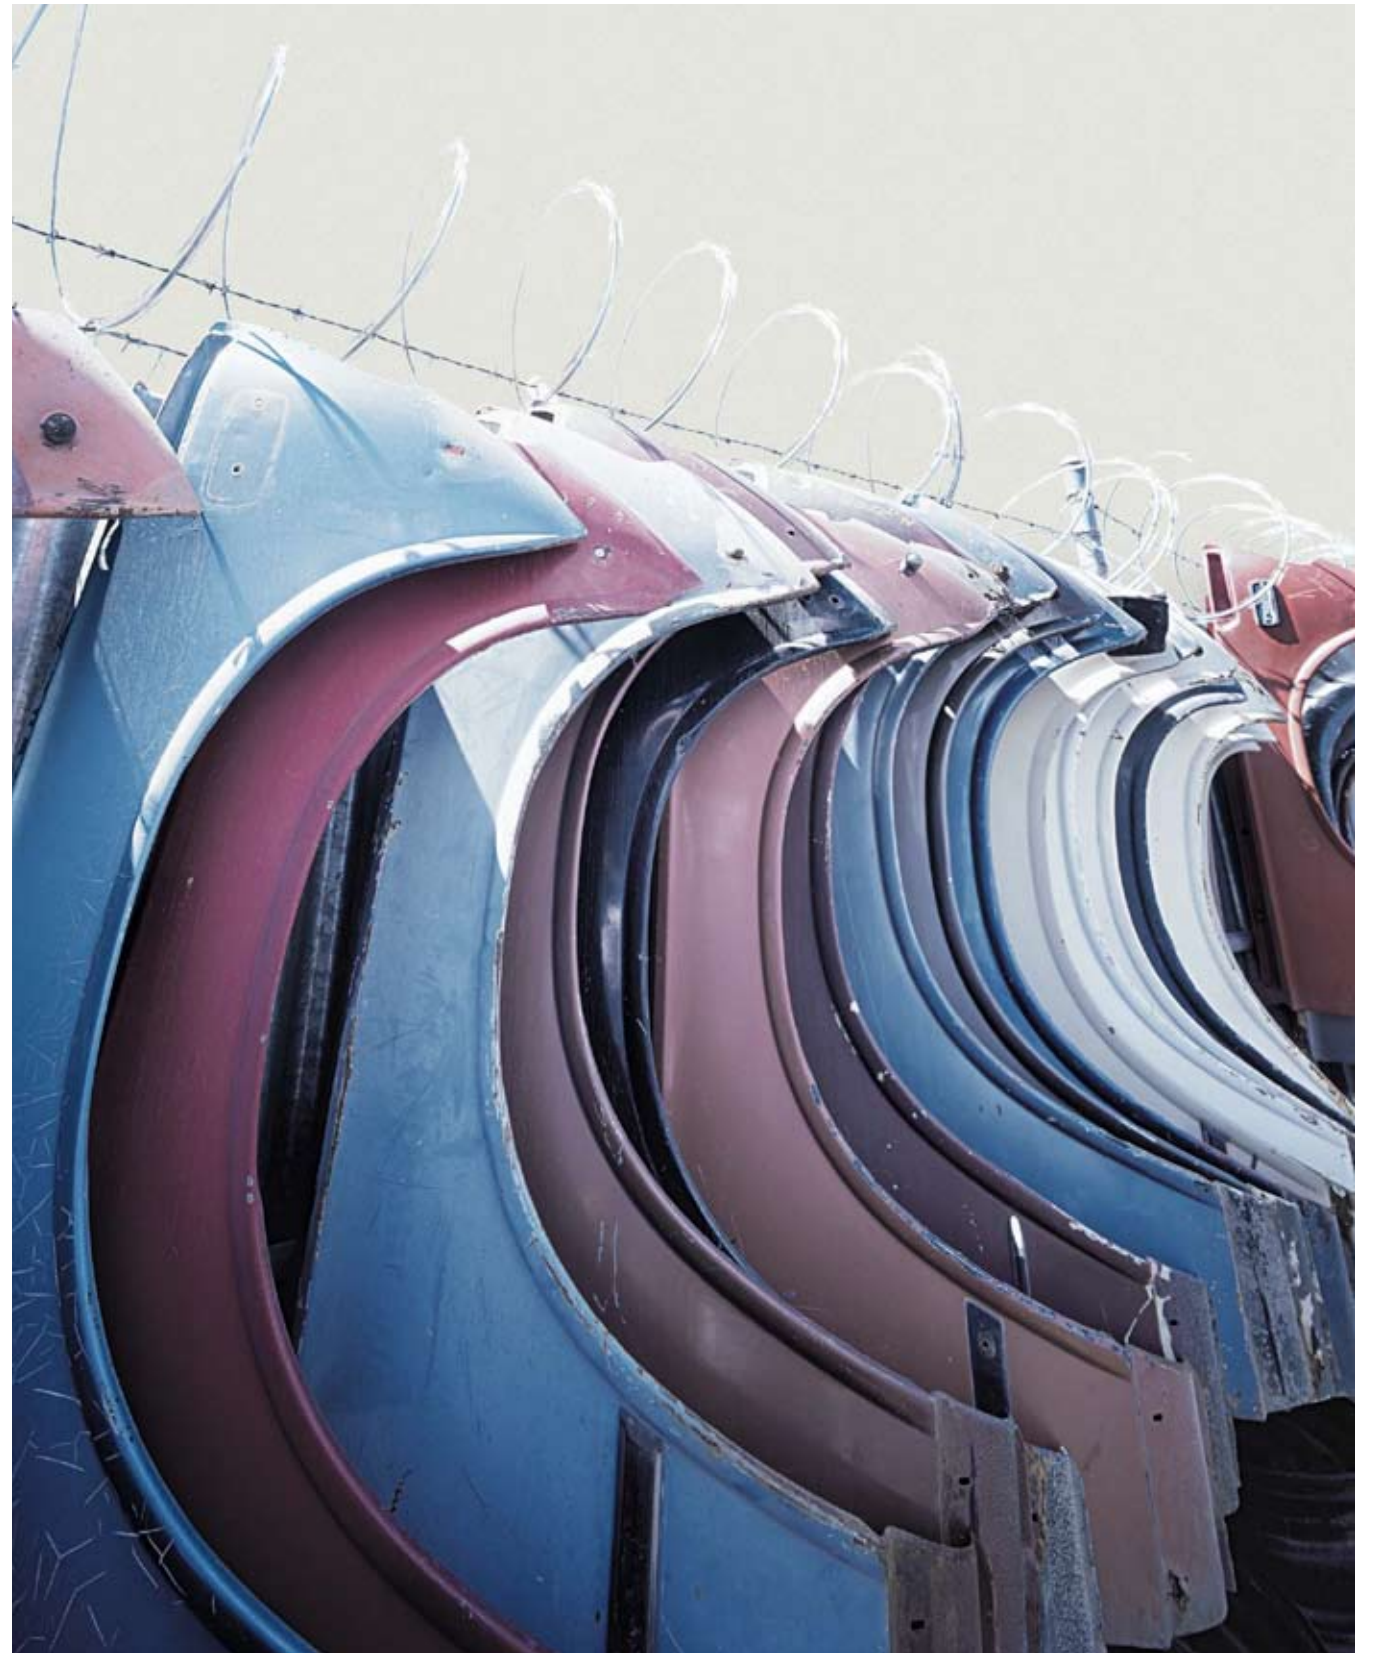

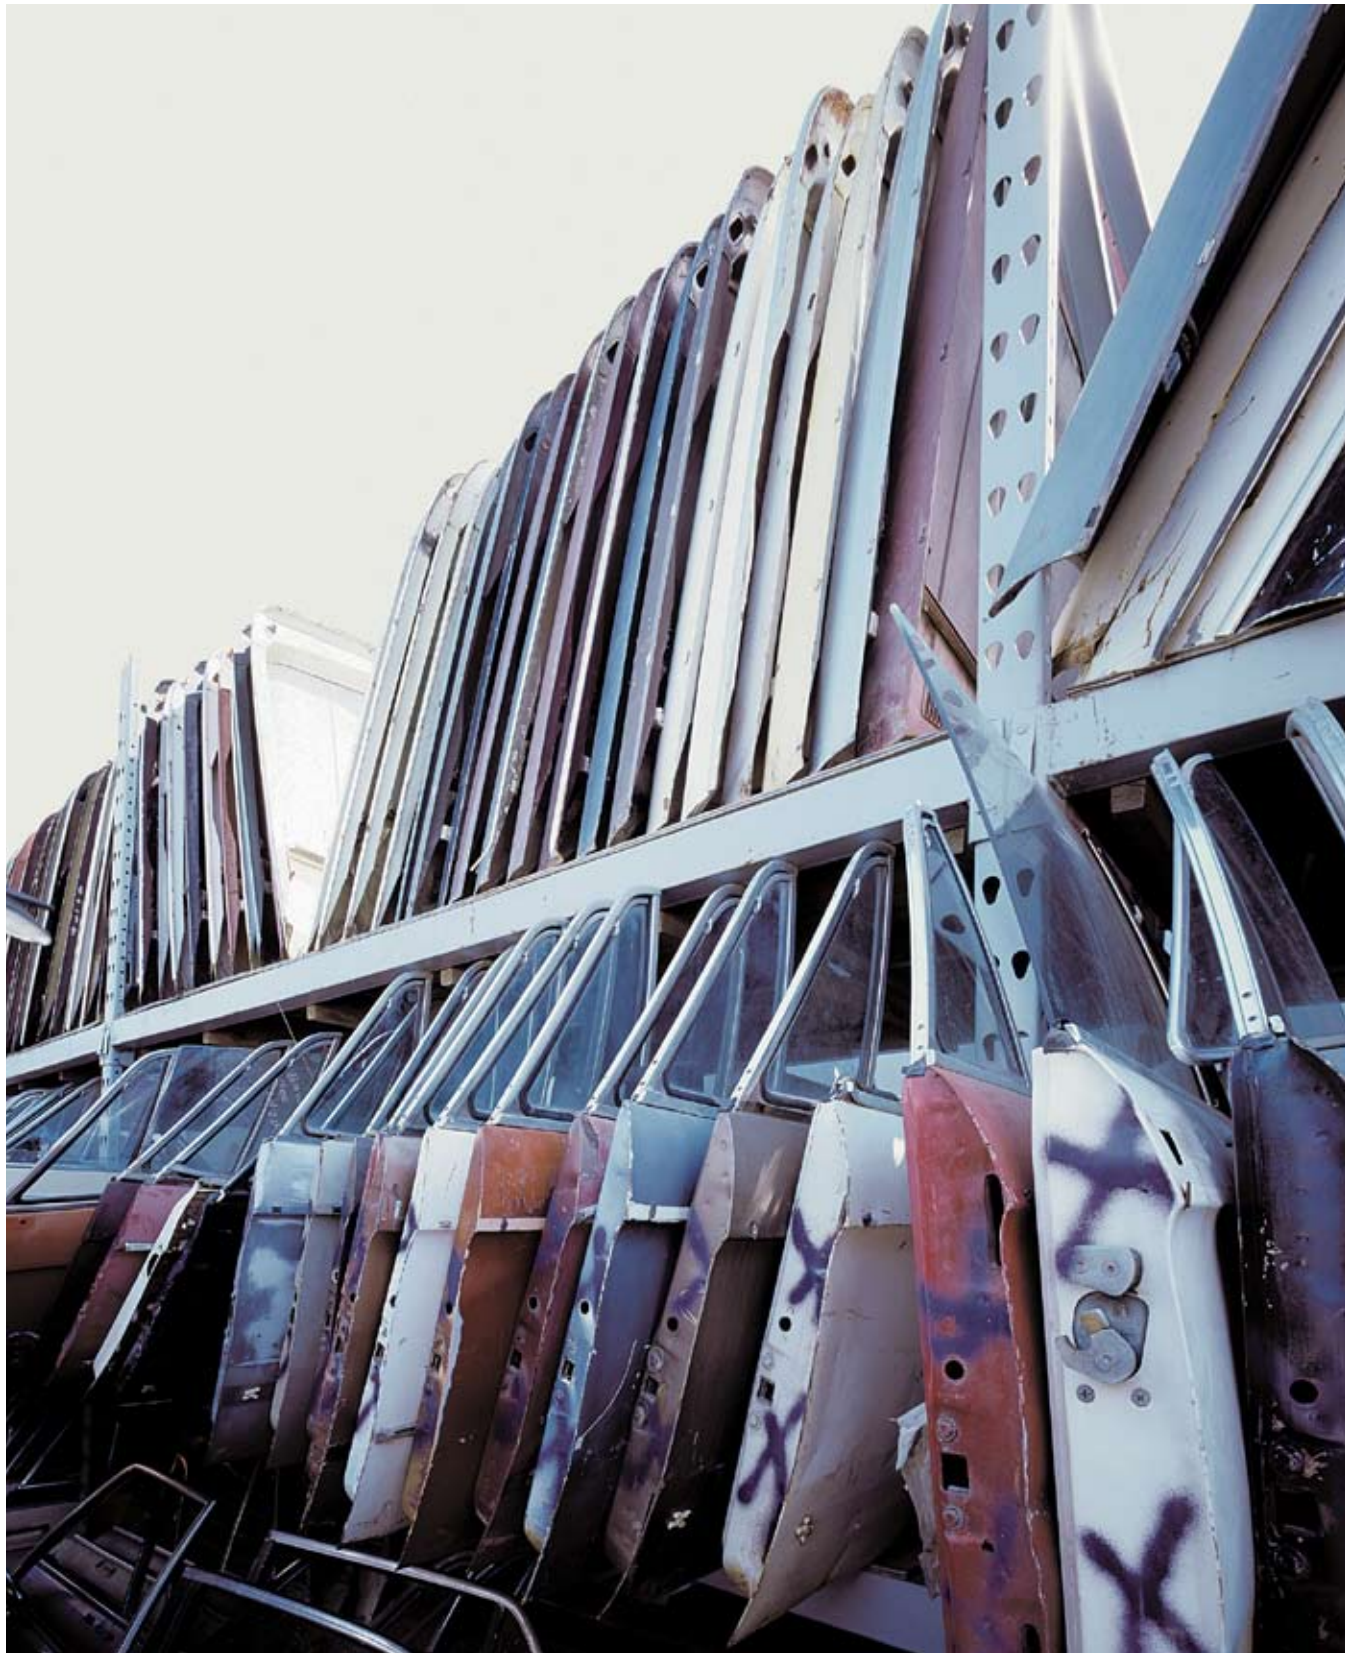

**Whatever the road holds.
The new Audi A6.**

The new A6 comes with Quattro permanent four wheel drive technology to give you superior traction and better handling. Even under some of the most testing of driving conditions.

Vorsprung durch Technik www.audi.de

**Whatever the road holds.
The new Audi A6.**

The multi-media interface (MMI) in the new A6 lets you access all the car's features with just one simple control. So you can keep your concentration on the road ahead, whatever it is you have to drive through.

Feel the seamless power of the world's first 8-speed automatic transmission.

From this point on, automotive 'benchmarks' of the past are just that: things of the past. Never before has there been a higher expression of the motor vehicle than the new LS 460. Why? Because never before has a luxury vehicle manufacturer been able to offer a seamless 8-speed automatic transmission with a flawless, fully re-engineered V8 petrol engine. What's more, all this technology is encased in a fuel-efficient, sound retardant and stunningly beautiful body

that goes far beyond simply looking perfect. It feels that way, too. Before an LS 460 reaches your hands, it has truly travelled through thousands of ours. From the hand-buffed leather on the steering wheel and hand-buffed paint, to the hundreds of engine components all cleaned by hand, the LS 460 has attained a new level that, quite simply, feels like perfection. No wonder it has just been named World Car of the Year. lexus.com.au

The New LS 460

Our most perfect air suspension means you only feel the parts of the road you should.

The new LS 460 was meticulously hand-crafted from the ground up, to express pure perfection in every aspect. Take the computer-controlled air suspension for example. In what can only be described as seamless anticipation, the suspension constantly adjusts its rigidity according to the road conditions and driver's style. For improved stability on a bumpy surface, the suspension automatically becomes more pliant, then it becomes firmer for

aerodynamic performance while cruising on the motorway. Before an LS 460 reaches your hands, it has truly been perfected by thousands of ours.

From the individual engine sound checks with a stethoscope to the smoother stitching pattern on the steering wheel, the LS 460 has reached a new

level that quite simply feels like perfection. No wonder it has just been awarded World Car of the Year. lexus.com.au

The New LS 460

A V8 engine crafted by thousands of our hands, to feel like perfection in yours.

No less than 1,866 of our engineers set out to create the world's most pure, most advanced and most economical petrol V8 engine ever.

Introducing, the new intriguingly elegant LS 460, powered by the world's first electric-motor driven VVT-i. Outputting an impressive 280kW, similar to the power of a 5-litre V8 but with efficiency comparable to some 3.5-litre engines. Before an LS 460 reaches your

hands, it has truly travelled through thousands of ours. From the hand-buffed paint and the steering wheel with ultra soft stitching to

the sculpted wood panelling, finished by the grand piano craftsmen of Yamaha, the LS 460 has reached a new level that quite simply, feels like perfection. No wonder it has just won the prestigious World Car of the Year award. lexus.com.au

The New LS 460

Wir haben über unseren Namen nachgedacht:

Hier das Ergebnis.

Der neue Fox. Echt Volkswagen.

Der neue Fox steht für alles, was einen Volkswagen ausmacht: Platz für 4 Personen, sparsame und kräftige Motoren ab 40 kW (55 PS)*, eine umfangreiche Serienausstattung, zum Beispiel mit ABS und einer klapp- und wickelbaren Rücksitzbank, sowie einen günstigen Preis. Am besten, Sie testen ihn bei einer Probefahrt. Infos beispielsweise über die günstige Finanzierung der Volkswagen Bank mit 1,9 % effektivem Jahreszins beim Volkswagen Partner oder unter 01802/VOLKSWAGEN (0,06 EUR/Anruf).
